

MARKET SEGMENTS

Meeting the exacting specifications of military and defense contractors is one of Qualicoat's specialties.

Military & Defense: Military Coating Capabilities Specifications

Military Spec Primers

- TT-P-1757 Chromate Alkyd Primer
- Mil-P-23377 Epoxy Polyamide Primer
- DOD-P-15328 Wash Primer
- Mil-P-53030 Lead & Chromate Free Epoxy Primer
- Mil-P-53022 Lead & Chromate Free Epoxy Primer
- TT-P-664 Red Oxide Primer
- Mil-P-26915 Zinc Rich Epoxy Primer
- TT-P-2760 Elastomeric Polyurethane Primer
- Many others...

Military Coatings

- Mil-DTL-22750 Epoxy Polyamide
- Mil-DTL-64159 Aliphatic Polyurethane—C.A.R.C.
- Mil-C-83286 Aliphatic Polyurethane
- Mil-DTL-53039 Aliphatic Polyurethane—C.A.R.C.
- Mil-E-15090 Alkyd Based Enamel
- TT-E-527 Alkyd Enamel Lusterless
- TT-E-529 Alkyd Enamel Semi Gloss
- TT-E-489 Alkyd Enamel Gloss
- Many others...

Federal Standard 595 Colors

- All colors available—customer or print must specify
- Mil-DTL-14072 Military Specification for Finishes for Ground Based Electronic Equipment
- Mil-Std-171 Military Specification for Finishing of Metal and Wood Surfaces
- TT-C-490 Federal Specification for Cleaning Methods for Ferrous Surfaces and Pretreatments for Organic Coatings

The optimal application of coatings that meet literally the life-or-death specifications required by the U.S. Department of Defense are regularly met—and exceeded—by Qualicoat. Coating examples include from top down: radar-eluding coatings on “Bunker Buster” missiles; a pneumatic power supply; a radio communication control assembly (center right), and hand-held device cover plate.

For more information on how of Qualicoat can help make your part, component or product better, please call **585-293-2650**.
